New York, NY | ms14565@nyu.edu | (917) 858-0235 | linkedin.com/in/maddhav-suneja | maddhav-suneja.github.io

EDUCATION

New York University, New York, NY May 2027

Bachelor of Science in Computer Science

Relevant Coursework: Introduction to Programming and Problem Solving, Data Structures and Algorithms, Object-Oriented Programming, Principles of Data Science II, Data Analytics and Visualization, Data Analysis, Calculus I&II, Linear Algebra, Introduction to Machine Learning, Introduction to Databases, Operating Systems

K.R Mangalam World School Gk-2, New Delhi, ND

2018 - 2022

CBSE Board Diploma

SKILLS

- Programming Languages: Python, C++, SQL
- Libraries: Pandas, NumPy, scikit-learn, Matplotlib, Streamlit, Flask
- Other Tools: REST API, Render, AWS, Figma

EXPERIENCES

Occupation Trends in Early NYC (1850–1854) | Python, Pandas, Streamlit, Google Maps API March 2026

NYU Data Services Urban Data Visualization Competition

- Processed 20K+ historical records; built pipeline to clean data and geocode 10K+ addresses for spatial analysis.
- Built interactive Streamlit dashboard uncovering workforce clustering and urban trends.

Assessing Professor Effectiveness (APE) | Python, Pandas, Statsmodels

April 2025

NYU Principle of Data Science-II Capstone Project

- Analyzed 89K+ RateMyProfessor ratings using Welch's t-tests and OLS regression; identified statistically significant gender and difficulty biases.
- Built logistic model for "pepper" label (AUROC: 0.774); validated via feature ablation and reproducible, seeded pipelines.

zAgent | ORA, Flask, Claude AI, Ethereum

March 2025

NYU Buildathon Project

- Developed an AI platform for personalized crypto investment recommendations using ORA for smart contracts and AI Agent Creation.
- Integrated Claude AI for market insights and Ethereum for secure transactions.

SuperBowl Sentiment Analysis Dashboard | Python, Flask, Dash, VADER, Heroku

Feb 2025

Independent Project

- Built a real-time dashboard analyzing 200+ cross-platform reactions to Super Bowl 2025 ads using VADER sentiment analysis.
- Deployed on Heroku with interactive visuals; tracked sentiment shifts for 15+ brands across Twitter, Reddit, and YouTube.

Finlitify | Python, Flask, Wolfram LongAnswers API

Dec 2023

HackNYU Winner Project

- Integrated LongAnswers API into the backend framework to develop a text-response based learning experience.
- Collaborated within a team of 3 people to create a user-centered financial literacy platform.
- Won Best WolframAlpha Hack Award at HackNYU 2023 out of 100+ participants.

COMMUNITY SERVICE

Hamari Pehchan NGO

May 2022 – June 2022

Volunteering Internship

- Led menstrual hygiene awareness campaign and raised \$820 through multiple rounds of social media fundraising.
- Drafted published articles that appeared in *Hindustan Times* to support outreach efforts.
